

in herniated disc tissue but not in control discs or in the residual discs of the herniation patients. Conclusion. **Antigen-antibody** complexes seem to be commonly present in herniated disc tissue, but not in healthy discs. However, the pathophysiologic and clinical significance of this observation has to be elucidated further.

CC Bones, joints, fasciae, connective and adipose tissue - General and methods 18001

Nervous system - General and methods 20501

Immunology - General and methods 34502

IT Major Concepts

Clinical Immunology (Human Medicine, Medical Sciences); Orthopedics (Human Medicine, Medical Sciences)

IT Parts, Structures, & Systems of Organisms

lumbar spine: skeletal system; nerve root: nervous system;

nucleus pulposus: skeletal system

IT Diseases

lumbar disc herniation: bone disease

IT Chemicals & Biochemicals

anti-human IgG **antibody**; **antigen-antibody** complexes

IT Methods & Equipment

immunohistochemistry: Immunohistochemical/Immunocytochemical Techniques, analytical method

ORGN Classifier

Hominidae 86215

Super Taxa

Primates; Mammalia; Vertebrata; Chordata; Animalia

Organism Name

human: patient

Taxa Notes

Animals, Chordates, Humans, Mammals, Primates, Vertebrates
